LEMAR HOLDING
COMPANY

CAPABILITY STATEMENT
SETA · CYBER · T&E · ILS · PROGRAM MANAGEMENT

Engineering rigor from undersea to orbit, from first requirement to final sustainment.

COMPANY OVERVIEW

Lemar Holding Company LLC (LHC) is a San Diego-based Service-Disabled Veteran-Owned Small Business providing Systems Engineering and Technical Assistance (SETA), cybersecurity and NSA certification, test and evaluation, program management support and Integrated Logistics Support/Engineering (ILS/ILE) to Department of Defense space, maritime and C4I acquisition programs and their industry partners. Founded in 2018, LHC brings senior expertise in space systems, military SATCOM and C4I to program offices that need objective, lifecycle-minded support.

CORE COMPETENCIES

Systems Engineering & Technical Assistance

- Requirements Development & Traceability
- Architecture & MBSE
- Technical Reviews (SRR through PRR)
- Risk Mitigation & Burn-Down Planning
- C4I Integration & OCONUS Site Certification
- Trade Studies & Independent Assessments

Cybersecurity & Certification

- RMF Authorization (NIST, CNSSI 1253)
- NSA ECU Certification (SERD, IASRD, CM2)
- CSfC & CHVP Solution Integration
- POA&M Mitigation & Burn-Down

Test & Evaluation

- T&E Strategy (TEMP / MTS)
- Test Procedure Development & Review
- Test Automation
- DT/OT Witness, Analysis & Final Reports

Program Management Support

- SOW / PWS Development & Review
- Acquisition Strategy & Milestone Packages
- RFP & Source Selection Support
- Technical Evaluation of Vendor Submissions
- CDRL & Deliverable Review
- Program Reviews & Boards

Integrated Logistics Support & Engineering

- LCSP & Product Support Analysis
- Maintenance Planning & RAM Analysis
- Supply Support, Provisioning & DMSMS
- Technical Manuals & IETMs
- Training & Training Support
- Support Equipment & PHS&T

PAST PERFORMANCE

SUB TO KRATOS DEFENSE & ROCKET SUPPORT SERVICES · SEPT 2025 – PRESENT

Integrated Logistics Support | Special Advanced EHF (AEHF) Terminal Program

ILS for NIWC Pacific on a Navy protected SATCOM terminal: sustainment planning, logistics documentation, supply support and provisioning, technical data and configuration support, and logistics IPT integration.

DIFFERENTIATORS

- **Space & SATCOM depth.** 20+ years across space, ground and user segments.
- **Digital engineering.** MBSE keeps requirements and verification aligned.
- **Lifecycle view.** Engineering and sustainment as one discipline.
- **Objectivity.** Independent advice; the government's interest first.
