

Engineering rigor from **undersea to orbit**, from first requirement to final sustainment.

COMPANY OVERVIEW

Lemar Holding Company LLC (LHC) is a San Diego-based Service-Disabled Veteran-Owned Small Business providing Systems Engineering and Technical Assistance (SETA) and Integrated Logistics Support/Engineering (ILS/ILE) to Department of Defense space, maritime and C4I acquisition programs and their industry partners. Founded in 2018, LHC brings senior-level expertise in space systems, military satellite communications and C4I to program offices that need objective, lifecycle-minded technical support.

CORE COMPETENCIES

Systems Engineering & Technical Assistance

- Requirements development & traceability
- Architecture & Model-Based Systems Engineering
- SEP, TEMP & milestone documentation
- Technical reviews (SRR through PRR)
- Test & evaluation planning and analysis
- Risk & issue management
- Cybersecurity / RMF & authorization support
- Trade studies & independent assessments

Integrated Logistics Support & Engineering

- Life Cycle Sustainment Plans (LCSP)
- Product support analysis
- Maintenance planning & RAM analysis
- Supply support & provisioning
- DMSMS / obsolescence management
- Technical manuals & IETMs
- Training & training support
- Support equipment & PHS&T

DIFFERENTIATORS

- **Space & SATCOM depth.** 20+ years of satellite communications engineering across the space, ground and user segments.
- **Integrated lifecycle view.** Engineering and sustainment treated as one discipline to reduce total ownership cost.
- **Digital engineering.** Model-based methods that keep requirements, architecture and verification aligned.
- **Objectivity.** Independent, product-neutral advice that puts the government's interest first.
